

The DRS 2006 LED Radio Clock

The DRS 2006 LED Radio Clock is a typical clock used in thousands of radio stations all over the world. This software is free and can be downloaded on our website at www.radioautomation.com in the "Explore" section.

Options

You can alter the appearance of your clock by clicking on the 'Options' button in the top left hand corner.

Clock Size: By clicking on the arrows you can set the size of the clock.

Time LED Size: Clicking on the arrows will change the size of the time digits.

Time LED Spacing: This value specifies the spacing between the digits.

Tick LED Size: Increasing or decreasing this value will change the size of the ticks.

Date Size: Clicking on the arrows alters the size of the date shown above the clock.

Active Color: Click on the colored box to the right to change the color of the date and time along with the minor ticks.

Passive Color: Click on the colored box to the right to change the color of the major ticks.

24 hour Clock: Check the box beside it to select a 24 hour clock. Leave it unchecked if you prefer a 12 hour clock.
